

# EZ-Vee™

Thank you for Buying KayakPro EZ -Vees® please observe the following simple safety precautions for safe use of our product.

1. Ensure that the Cross rack manufactures guidelines are adhered to.
2. Do not overload factory racks, rails or cross racks.
3. Space Thule or Yakima racks as far apart as possible to achieve a stable base. A minimum span of 30 inches is recommended, for Pro Rack, 36 inches for Plus, and 45 inches for XL
4. Centralize the Pro, Plus and XL racks over the cross racks below.
5. Locate cross racks as near to roof rails supports as possible.
6. EZ-Vees® will support kayaks up to 60 Lbs, but flexing may occur with some factory rails. If in doubt tie front and rear of kayak to reduce bounce.
7. Make sure your Kayak is strapped down with 2 EZ- Vee® bungees, front and back.
8. Always Drive Carefully.
